OBJECTIVE

Penultimate-year software engineering student seeking a 3- to 5-month internship abroad between May and September 2027.

EDUCATION

Master of Science in Software Engineering - Currently **ranked first** in class
Work-study program, IMT Atlantique Nantes, FRANCE
Expected graduation in August 2028

Bachelor of Technology in Computer Science - **Valedictorian**
Work-study program, Aix-Marseille University Arles, FRANCE
June 2025

High School Diploma in Mathematics, Biology, Physics and Chemistry June 2022

RELATED COURSES

Distributed Systems	Operating Systems	DevOps	Software Design
Graph Theory and Algorithms	Formal Methods	Software Quality	Agile Methodologies

PROFESSIONAL EXPERIENCE

IT Architect, Covéa - *Leading French mutual insurance group* Le Mans, FRANCE
Apprentice September 2025 – August 2028

- Architect and design complex large-scale information systems, ensuring high availability, scalability, and alignment with business objectives.
- Spearhead project lifecycles by managing end-to-end delivery, including strategic planning, budget allocation, and cross-functional team leadership.
- Validate developed features to ensure high quality and strict compliance with system specifications.
- Provide Level 2 technical support, troubleshooting incidents and assisting users.
- Conduct infrastructure and cost analysis, documenting findings and technical solutions to support implementation decisions.

Software Developer, Dev-id - *Digital agency specializing in custom software solutions* Marseille, FRANCE
Apprentice September 2024 – June 2025

- Engineered and maintained full-stack web applications, driving both feature enhancements and complex bug resolution.
- Managed the end-to-end software lifecycle, from development to deployment and configuration on production servers.
- Optimized application performance and reliability by writing clean, scalable code.
